5 Risk Factors

5.1 Specific Risks

The performance of the fund is dependent upon the investment policy as well as on the market development of the individual investments of the respective segment, and cannot be determined in advance. In this context it is important to note that the value of a unit relative to its issue price can rise or fall at any time. It cannot be guaranteed that the investor will receive back his invested capital.

In addition to the general risks, investments in the fund are subject to the following specific risks:

Focussed Investment

On account of the fact that the SafePort LOICK Bio-Products & Bio-Energy Fund makes the largest proportion of its investments only in the investment types, mentioned in 4.1., it is exposed to market and issuer risks with this type of investment which can have a negative impact on the net asset value of the Fund. Also the performance of the fund can therefore differ from the general performance of shares and capital markets.

Entrepreneurial risks

Subject to all functions in conjunction with the selections, the participation and the administration of the Fund's portfolios, the investment manager will apply due diligence to achieve the overall aim of the Fund. So the investment manager assumes no liability and responsibility that the selected investments, especially in the context of changing market- or other framework requirements, increase as expected.

Portfolio risk

The investments are individual projects which are subject to the typical risks, singular or in its entirety of an investment.

5.2 General risks

In addition to the specific risks, investments in the Fund can be subject to general risks.

All investments in investment companies are associated with risks. These risks can include or be related to share and bond market risks, exchange rate, interest, credit and volatility risks as well as political risks. Every one of these risks can also arise in conjunction with other risks. Some of these risks are described in this section. You should nevertheless be aware that this is not a conclusive list of all possible risks.

Potential investors should be aware of the risks relating to investment in shares and only make a decision to invest when they have been comprehensively advised by their legal, tax and financial advisors, auditors or other experts of the suitability of an investment in shares in this fund, taking into account their personal finance and tax situation and other circumstances, as well as information contained in this prospectus and the investment policy of the fund.

Counterparty risk

The risk is represented by the fact that the performances of transactions, which are concluded on account of the segment's assets, are endangered by solvency problems or insolvency on the part of the corresponding counterparty.

The settlement of the transactions may not be delivery vs. payment.

Monetary value risk

Inflation can reduce the value of investments in the segment's assets. The purchasing power of the invested capital falls when the inflation rate is higher than the proceeds yielded by the investments.

Economic cycle risk

This is a question of the danger of exchange losses, caused by the fact that, when making the investment decision, no account or insufficient account was taken of cyclical trends, leading to investments in securities being made at the wrong time, or securities being retained during an unfavourable economic phase.

Country risk

Investments in countries where the political situation is unstable are subject to particular risks. These may lead to extremely rapid and significant fluctuations in rates. These risks include, for example, currency restrictions, transfer risks, moratoria or embargos.

Liquidity risk

In the case of shares in smaller companies (second-line stocks) there is a risk that the market may sporadically not be liquid. This can result in it not being possible to trade shares at the required time and/or not in the required quantity and/or not at the anticipated price.

Market risk (Foreign exchange risk)

This is a general risk associated with all investments, which consists of the value of a certain investment potentially changing counter to the interests of the segment.

Psychological market risk

Moods, opinions and rumours can cause significant declines in market prices, although the profit situation and the future prospects for the company, in which an investment has been made, may not have undergone a sustained change. A psychological market risk has a particular effect on shares.

Settlement risk

This is a question of a risk of loss for the segment, caused by a concluded transaction not being completed as anticipated, because counterparty has not paid or delivered, or a loss occurring because of mistakes in operations when handling a transaction.

Tax risk

Buying, holding or selling investments in the segment may be subject to the provisions of tax legislation (e.g. tax deducted at source) outside the country of domicile of the fund.

Business risk

Investments in shares represent a direct involvement in the economic success or failure of a company. In extreme cases – in the event of insolvency - this can mean the complete loss of the corresponding investments.

Currency risk

Should the segment contain assets, which are expressed in a foreign currency, investments are exposed to a direct currency risk (where foreign currency positions are not secured). Falling exchange rates lead to a reduction in the value of foreign currency investments. In the opposite case, the currency market also offers opportunities for profits. In addition to direct as well as indirect currency risks, international companies are more or less greatly dependent on changes in exchange rates, which can also have an indirect effect on the price performance of investments.

Interest rate risk

Where the segment invests in interest-bearing securities, investments are exposed to an interest rate risk. Should the market rate raises, the market value of the interest-bearing securities forming part of the segment's assets may fall significantly. This applies all the more where the segment's assets also contain interest-bearing securities with longer remaining terms and lower nominal interest.

5.3 Value of Investment

The value of investments in the Fund can fall as well as rise resulting in an adverse effect on the value of the Investor Shares.

5.4 Duration of Investment

Investments in the markets may experience periods of draw down or loss. For this reason investors should plan to commit funds for at least five years, although this is not an obligation.

5.4 Income

As described above, the Directors do not intend to declare dividends on the Investor Shares. An investor who wants to get liquidity is obliged to make a redemption of investment parts.

5.6 Past Performance

Past performance of the Investment Manager or the Fund is not necessarily indicative of future results attributable to the Investor Shares.

5.7 Volatile Markets

Price movements in the markets in which the Fund will invest can be volatile and are influenced by, among other things: changing supply and demand relationships; government trade and fiscal policies; national and international political and economic events and changes in exchange rates and interest rates.

5.8 Leverage

The Fund may leverage its assets through borrowing as stated in section 4. This may cause a certain fluctuation of the Fund's NAV.

5.9 Illiquid Markets

In some circumstances, the markets in which the Fund will invest can become illiquid, making it difficult to acquire or dispose of assets at the prices at normal market offers.

5.10 Tax and Regulatory Change

The tax consequences to the Company and Shareholders in the Company, the ability of the Company as a foreign investor to invest in certain markets, ability of the Company to repatriate its assets, including any income and profit earned on those assets, and other operations of the Company are based on existing regulations, which are subject to change through legislative, judicial or administrative action in the various jurisdictions in which the Company may operate or invest. It is recommended that an investor seek advice from his tax adviser before making an investment in the Company as to the potential tax consequences of such an investment.

5.11 Effect of Substantial Redemptions

Substantial redemptions of Investor Shares could require the Fund to liquidate investments/positions more rapidly than would otherwise be desirable, which could adversely affect the value of the Investor Shares. Substantial redemptions might also cause the liquidation of the Fund.

5.12 Limited Ability to Redeem

Although Shareholders may generally require the Company to redeem any or all of their Investor Shares on any Redemption Day at the prevailing Redemption Price, restrictions apply in certain circumstances (see Section 13).

5.13 Cross Liability

The Articles of Incorporation of the Company empowers the Directors to amend the By-Laws so as to create different classes of Shares from time to time. The Directors will ensure that the trading results of the Fund will have no effect on the value of any other Fund and the trading results of any other Fund will have no effect on the value of this Fund.

5.14 Exchange Rate Fluctuations

Certain of the investments of the Fund may be in currencies other than Euro. Accordingly, adverse exchange rate fluctuations may cause the value of the investments of the Fund to diminish.

5.15 Trading Costs

All trading costs will be borne by the fund.

5.16 Broker

The Company will rank as one of the Broker's unsecured creditors in relation to assets which the Broker borrows, lends, pledges or hypothecates and, in the event of the insolvency of the Broker, the Company might not be able to recover equivalent assets in full. In addition, the Company's cash held with the Broker will not be segregated from its own cash and will be used by the Broker in the course of its investment business, and the Company will therefore rank as an unsecured creditor in relation thereto.

6 Fees, Compensation and Expenses

The Fund will be responsible for its various administrative and operational expenses.

6.1 Issue commission

To cover the costs caused by the placement of the units, the Company may charge an issue commission on the net asset value of the newly issued units in favour of the Company, the Depository Bank and/or the marketing agents in this or other countries as stated in Section "Useful Information".

6.2 Redemption commission

For the payment of redeemed units, the Company can charge a redemption commission on the net asset value of the redeemed units in favour of the Company, the Depository Bank and/or the marketing agents in this or other countries as stated in Section "Useful Information".

When paying the liquidation balance, in the event that the fund is dissolved, the management company can charge a redemption commission pursuant to Section "Useful Information".

For the registrar and transfer agent duties the Administrator can charge a commission for Class EUR of 0.20 %, minimum EUR 60.- and a maximum EUR 1'000.- resp. for Class CHF of 0.20 %, minimum CHF 60.- and a maximum CHF 1'000.-, upon subscription and redemption, as well as for Class EUR 0.10 %, minimum EUR 30.- and a maximum EUR 500.- resp. for Class CHF 0.10 %, minimum CHF 30.- and a maximum CHF 500.- upon conversion between SafePort-Funds, payable by subscriber.

At the sole resolution of the Directors the conversion fee can be charged at the expense of the fund.

Further on the Administrator charges any mailing or emailing costs of statements and account statements, payable by the Fund.

The Fund will pay an annual management/distribution fee, payable quarterly in arrears pro rata temporis, in the amount of max. 1,8 % of the average value of the Fund. The Fund will pay an annual administration fee, payable quarterly in arrears pro rata temporis, in the amount of 0.25% of the average value of the Fund, subject to a minimum of CHF 25'000 per annum. The Fund will pay an annual administration fee for the registrar / transfer agent, payable quarterly in arrears pro rata temporis, in the amount of 0.05% of the average value of the Fund.

6.5 Performance Fees

The Fund will pay a performance fee of 10% p.a.

6.7 Trading Fees

All trading fees, such as brokerage fees, stock exchange fees, taxes, etc., shall be paid by the Fund.

6.10 Organisation and Offering Expenses

The expenses incurred by the Company in connection with the organisation of the Company and as attributable to the Fund and initial and on-going offerings of Investor Shares, which, at the date of this Memorandum, are estimated not to exceed EUR 50'000.- will be reimbursed by the Fund. These expenses may be amortised over a period of max. sixty (60) months, or such shorter period as the Directors may determine, so long as the Fund remains operating. Offering expenses incurred in any subsequent offerings of the Investor Shares will be paid by the Fund.

6.11 Regular and Extraordinary Expenses

The Directors and the Administrator are also entitled to the reimbursement of the following outlays that have resulted for them from the exercise of their function:

6.13 Earnings from refunds of the target funds

The fund aims to receive refunds of the management fees of the target funds in favour of the assets of the fund.

6.14 Ensuring of the concerns of the investors

Neither the directors of the company nor the investment managers or the marketing and distribution agents are allowed to receive provisions for the distribution of target funds. Referring to this every provision has to accrue to the assets of the fund.

7 Net Asset Value

The By-Laws of the Company provide for the valuation of the Investor Shares of the Fund by reference to the NAV of the Fund. The NAV of the Fund and the NAV per Investor Share will be determined on the Calculation Day by the Administrator, on the basis of the prevailing prices at the close of business of the markets on the Valuation Day.

The NAV shall be determined by or at the direction of the Directors or by the Administrator and made available at its Registered Office or such other office as the Directors may determine.

The Calculation Day shall be the first business day of the Administrator following the Valuation Day.

The Valuation Day shall be weekly, on Thursday.

In the case, that the main markets in which the fund trades are closed on this day, the Valuation Day shall be the day before. If any clarification is necessary to approve the valuation of an investment of the Fund, the publication of the NAV may be delayed up to max. the last business day of the following month.

Due to the accumulation of bank holidays between 22nd December and 7th January each year there can be a distortion of the valuation prices of the target investments of the fund. This could be based on missing liquidity (low trade volumes) and different business hours of the international stock exchanges. This leads to difficulties in assessing if sufficient price quality exists and therefore transactions within the share register of the fund can be carried out fairly. Another difficulty lays in the comprehensible communication of the deadline for share register transactions as the relevant NAV (net asset value) could occur several days later with the result that the issue or redemption of shares/units will be delayed.

For funds with daily or weekly valuation intervals the administration company has the option to amend the rules in regard to issue and redemption of shares as well as the calculation of the NAV differing from the usual valuation days between the 22nd December and 7th January each year. The administration company can resolve the postponement or cancellation of the single valuation days. Furthermore the administration company can resolve that orders can be accepted for the NAV as of 31st December.

The administration company will inform the investors about the amended modalities of orders and valuations of the NAV in the official publication platform of the fund or by direct information not later than 30th November each year.

7.1 Determination of the NAV of the Fund

The assets shall be valued as follows:

- a) In accordance with generally accepted accounting rules (e.g. Managed accounts, which are kept with a broker, determined by the Directors of the Company, can be booked with their end-of-period profit/loss statements. The Administrator is not obliged to book each single trade).
- b) Securities, which are traded on official exchanges or traded on other organised markets, are valued at the closing price on the valuation day on the principal market on which such securities are traded.
- c) Collective investments: the basis for the valuation of the investment positions is the most recently available net asset value of the respective investment position on the respective valuation date. All assets which are not denominated in the Fund currency shall be converted into the unit of account pursuant to the foreign exchange closing price on the respective valuation date.

- d) The liquid assets will be valued on the basis of their nominal value plus accrued interest.
- e) Assets that are denoted in a currency other than the fund's reference currency will be converted using the closing exchange rate of that currency
- f) Valuation of non-listed companies

The following two investment values are not officially listed securities and are to be economically assessed as follows:

Investment 1: Loick AG, domiciled in 46286 Dorsten, Deutschland

Investment 2: SafePort Loick Finanz AG, domiciled in Triesen, Liechtenstein

Valuation of Loick AG

Loick AG is an owner entrepreneur constituted company; it started in 1994 with farmer Hubert Loick developing industrial organic products. These were designed to replace the corresponding plastic products that were produced on a crude oil basis by CO₂-neutral products. These organic products, e.g. packaging materials developed for the protection of parcels against damage, and further organic products (e.g. the toys PlayMais produced from maize) can in the mean time be found in market leading positions. This fact could only be achieved by qualitative advantages that Loick AG produced in their organic products for the market and/or their products representing a clearly better economic value than the plastic products to date.

The raw materials/commodities and the market performance (i.e. products to be sold or provision of services) of Loick AG primarily consist of real values. Loick further offers products that are becoming scarce but still cover primary social needs (warmth, electricity, essential packaging materials etc.) These facts, mentioned together with the independence from oil, signify an important reduction of the entrepreneurial risks. In addition there is Loick's technological market leadership and the implementation of the entrepreneurial activities in small regional centres of production close to the actual demand.

The company sees itself now in a very clear turnover and revenue development. As a partner in investment and co-operation Loick AG associated in 2013 with the newly established investment fund SafePort Loick Bio-Products & Bio Energy Fund in terms of participation and as a business partner. The Fund is holding a stake in Loick AG planned to include between 30% and 35% of the share capital of Loick AG.

The valuation of Loick AG is based on the commercial balance sheet of Loick AG, pursuant to the German commercial law.

From the very beginning of its corporate history Loick AG has consequently been striving to accumulate undisclosed reserves and has financed investments with means that have if possible been produced by itself. The values in its commercial balance sheet therefore hold significant undisclosed reserves in comparison/contrast with its market value (genuine sales value). The Fund endeavours to apply a valuation basis that truly reflects the authentic market value (genuine sales value). The Fund assesses the Loick AG shares on a basis of the five- or sixfold consolidated cumulative profit as shown in Loick's balance sheet. This basis of assessment is taking account of cumulative earnings of previous financial years on the one hand and the expected profit of the current financial year on the other hand. This basis of assessment is estimated to be an adequate one in the eyes of the Fund management and corresponds to the estimated selling price that is likely to be realised if Loick AG or the stake held by the Fund in Loick AG were to be sold to independent third-parties. A sale of the actual majority stake in Loick AG by the entrepreneur Hubert Loick to independent third-parties is however not a matter of consideration.

The Fund's stake in Loick AG is between 15% and 30% of the total fund assets. The Fund regards the stake in Loick AG as a solid long-term investment whose sale will only then be taken into consideration if Loick AG prepares fundamental economic or financial changes. A good and solid development of profits in Loick AG is an essential basis of the investment and is under continuous supervision.

Valuation of SafePort Loick Finance AG

In addition to the stake in Loick AG the Fund is a 90% owner of a holding company, SafePort Loick Finanz AG domiciled in Triesen (Liechtenstein). This company is exclusively funded by Fund loans and is itself the 100% owner of a sub-holding company in Germany, SafePort Bioenergie Beteiligungs GmbH domiciled in DE-38667 Torfhaus. It is the task of this sub-holding company to purchase bio-energy production companies, to fund their equity base by loans and to obtain long-term investment loans at favourable conditions from German banks. The production companies acquired and operated by the sub-holding company are customarily funded with 75% up to 80% of the total investment of long-term bank loans.

The predominant part of the profits by SafePort Loick Finanz AG therefore results from fixed interest incomes accruing from its 100% subsidiary SafePort Bioenergie Beteiligungs GmbH, Torfhaus. The profits accumulating from its sub-holding are allocated in the course of the respective following financial year owing to the reported earnings. The profits are only then taken into consideration in bookkeeping when they have actually been transferred.

SafePort Loick Finanz AG Triesen (holding company) is being assessed by the Fund at the nominal value of the share capital. The freely available profits are completely forwarded as dividends to the Fund within the framework of their claims of participation. The dividends are only then taken into consideration by the Fund when they actually materialize in the following year.

SafePort Bioenergie Beteiligungs GmbH is being assessed by SafePort Loick Finanz AG at the nominal value of the share capital as well as the claims (loans and interest claims). The profits are only then taken into consideration as such by SafePort Loick Finanz AG when they actually accumulate in the the form of dividends.

The management of the sub-holding company (SafePort Loick Bioenergie Beteiligungs GmbH) is being jointly performed by delegates of Loick AG and delegates of the fund. The delegates of the fund in the supervisory board do not claim personal fees for their management activities, but are paid compensation in completely transparent modalities via the fund fees and expenses as stated in the Offering Memorandum.

Activation of hidden assets

SafePort Bio-Energy Beteiligungs GmbH is 100% owned by SafePort Loick Finanz AG, 9495 Triesen (Liechtenstein) and is participating in various bio-energy firms. Every single bio-energy plant is being operated on separate terms.

SafePort Bio-Energy Beteiligungs GmbH is in the first place oriented towards the acquisition and the operation of bio-energy plants, as well as the acquisition of bank-based outside capital for its subsidiary companies. The company is being assessed based on standards of commercial law, i.e. for reasons of prudence on the nominal value of the share capital of only € 100,000.--. This is justified because achieved profits are consequently being transferred to the parent company.

As a result of the permitted rates of depreciation based on commercial law the subsidiary companies of SafePort Bio-Energy Investment GmbH create substantial hidden assets in comparison with an actual value validation (= managerial valuation). This fact is substantiated by technological expert reports of a neutral and competent technological institute (Fraunhofer Institut für Umwelt-, Sicherheits- und Energietechnik, DE-46004 Oberhausen).

For the prevention of discrimination of the actual fund investors in comparison with future fund investors the Fund is obliged towards all fund investors, owing to the principles of equal treatment, to admit the above mentioned creation of hidden assets only to a minimal extent. Based on these considerations the Fund is therefore requested to consider and to activate the hidden assets evidently building up in the valuation of the fund assets. For reasons of administration or because of legal obligations the activation and declaration of hidden assets is commonly taken into account in the valuation of the following year instead of the year of occurrence for the valuation of the fund assets.

7.2 Temporary Suspension

The determination of the NAV per Investor Share may be suspended for any reason outlined in Section 13. No Investor Share may be issued or redeemed during a period of suspension.

In the event of a suspension of the determination of NAV per Investor Share, a Subscriber/Shareholder may withdraw his request for purchase or redemption of Investor Shares, provided such a withdrawal notice is actually received before the termination of the period of suspension. Where the request is not so withdrawn, the purchase or redemption of the Investor Shares will be made on the next Subscription/Redemption Day following the end of the suspension.

Should the execution of a redemption order lead to the holdings of the given investor falling below a minimum investment, the Company may without further notifying the investor treat this redemption order as an order to redeem all the units of the Fund held by the said investor.

In the event of a large volume of redemption applications, the Management Company may decide to settle a redemption application only when, without an unreasonable delay, corresponding assets of the Fund can be sold. This can take (e.g. due to the sale of the investments on auctions) several months up, so that the settlement of redemptions can take place over up to twelve months later. If such action is necessary, all the redemption applications received on the same day will be settled at the same price.

If, instead of at the absolute discretion of the Depository Bank, the payment is to be made at the demand of the investor in a currency other than the currency in which the units in question were launched, the sum to be paid is calculated from the proceeds of the conversion of the currency of the account into the payment currency.

After the payment of the redemption price, the unit in question is invalid.

Requests for the redemption of Investor Shares must be made in accordance with the Redemption Request Form which accompanies this Offering Memorandum (see Appendix B).

The Company and Registrar are entitled to require additional documents, such as, but not limited to, trust instruments, death certificates, appointments as executor or administrator and certificates of corporate authority prior to making any payment in respect of redemptions.

Requests for redemption of Investor Shares must be received by the Administrator no later than 16:00 CET on the relevant Redemption Day. If a Redemption Request is received less than 16.00 CET to the relevant Redemption Day, the Investor Shares will be redeemed on the Redemption Day subsequent to the relevant Redemption Day; however the Company may, if conditions allow, accept a shorter notice period for any redemptions.

Investor Shares will be redeemed with effect from the relevant Redemption Day. Upon final calculation of the Net Asset Value per Investor Share, written confirmation will be sent to investors within five (5) Business Days of the number and value of Investor Shares redeemed.

In the event that Investor Shares are redeemed by way of a compulsory redemption, those shares shall be redeemed at the normal Redemption Price. The Directors, at their discretion, may waive any applicable Redemption Fees.

In the case where the compulsory redemption is made due to a breach by the shareholder of the terms of this Memorandum, which causes the fund to not be in compliance with the limitations and restrictions on the ownership of Investor Shares set forth in this Memorandum, a further Redemption Fee of 1 % may be applied by the Directors.
